

Optical Quartz Products

Crystal Plate for Projectors

■ Features

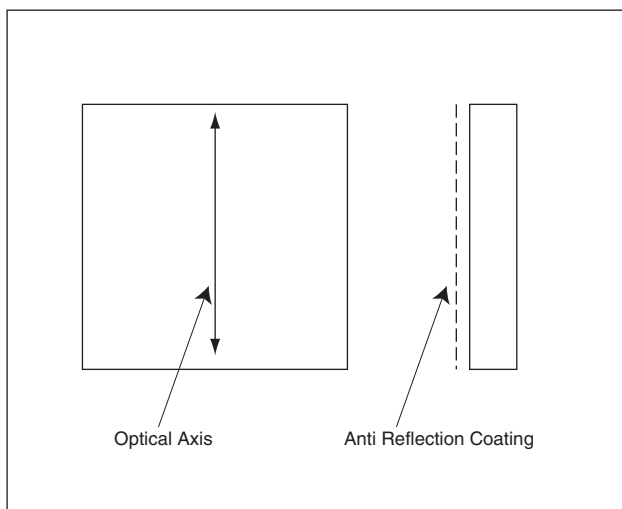

- The crystal plate for projectors is large and transparent, and made of high-quality crystal.
- Excellent heat dissipation due to the high thermal conductivity of crystal.
- Processed at an angle that is not affected by double refraction and can be used as a substrate of various films.

■ Specification

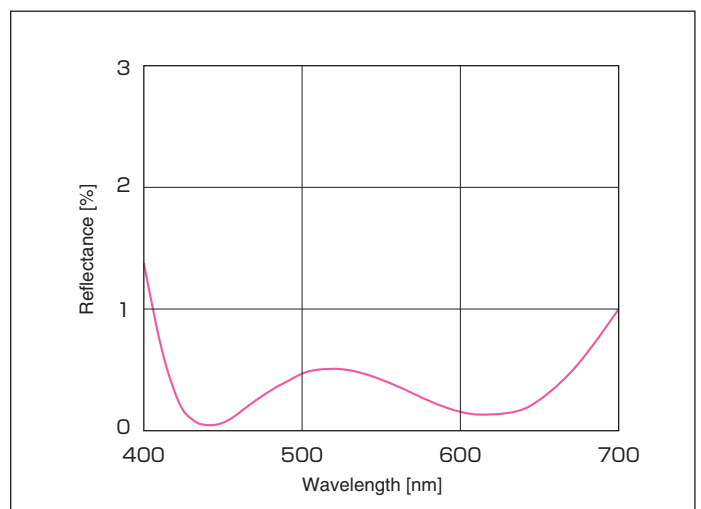

Item	Standard Specification
Dimensions	35.0×35.0mm max
Thickness	0.3mm min.
Anti Reflection Coating (per 1 side)	Reflectance 1.0% max./450~650nm
Effective Area	Except 1mm from outside
Humidity Guarantee (60°C,90%)	1000H

Consult our sales representative for other specifications.

■ Examples of Product

■ Example of Anti Reflection Coating Characteristics

※ Reflectance characteristic per one side (reflectance of back side is not included).
