

Notice Regarding the Adoption of “Subsidy for Large-Scale Growth Investment”

DAISHINKU CORP. (hereinafter the “Company”) hereby announces that the Company’s application for “Providing the Value of Product Performance and Stable Supply to the Rapidly Expanding Crystal Device Market with the Proprietary Product Arkh.3G” in the “Subsidy for Large-Scale Growth Investment in Labor-Saving and Other Initiatives Aimed at Wage Increases for Small and Medium-Sized Enterprises” implemented by the Ministry of Economy, Trade and Industry has been selected and the amount to be granted has been determined. The details are as follows:

1. Subsidy Details

Subsidized Project	Subsidy for Large-Scale Growth Investment in Labor-Saving and Other Initiatives Aimed at Wage Increases for Small and Medium-Sized Enterprises
Applicant	DAISHINKU CORP.
Subsidy Eligible Expenses	7,878,038,310 Yen
Maximum Subsidy Amount	2,626,012,769 Yen
Target Project	Providing the Value of Product Performance and Stable Supply to the Rapidly Expanding Crystal Device Market with the Proprietary Product Arkh.3G

The subsidy period is scheduled from March 2025 to December 2026. Subsidy eligible expenses and subsidies will vary depending on actual results.

2. Purpose of the Subsidized Project

In recent years, with the acceleration and expansion of communication speeds and capacities, there has been a societal demand for the supply of “high-frequency crystal devices requiring advanced technology” at low cost and in large quantities. To meet this demand, the Company will mass-produce the “Arkh.3G,” which has been developed over approximately 10 years, in a space-efficient manner and on a large scale, fulfilling our social responsibility and ensure the achievement of record profits under our second medium-term business plan, with the final year ending March 2027.

In addition, the Company will achieve sustainable growth of our technological capabilities and human capital by enhancing our appeal to human resources through both R&D investment based on improved business performance and higher employee incomes. The Company will also strive for corporate growth by building a cycle in which we become an important co-creation partner for our customers, using our advanced technological capabilities to discover their latent demands earlier and develop products that meet those demands in a timely manner.

3. Future Outlook

If any event that should be disclosed in the future occurs, the Company will be disclosed immediately.
